INFORMATION REPORT

Vision:

At Toronto Catholic we transform the world through witness, faith, innovation and action.

Mission:

The Toronto Catholic District School Board is an inclusive learning community uniting home, parish and school and rooted in the love of Christ.

We educate students to grow in grace and knowledge to lead lives of faith, hope and charity.

Rory McGuckin Director of Education

D. Koenig Associate Director of Academic Affairs

A. Sangiorgio Associate Director of Planning and Facilities

T.B.D. Executive Superintendent of Business Services and Chief Financial Officer

A. EXECUTIVE SUMMARY

In January 2015, the JUMP Math Pilot was initiated within the TCDSB. Schools (14) were provided with JUMP teacher and student resources, as well as professional development to support implementation. This report summarizes the results of surveys of teachers, parents and students and EQAO data for participating schools, and outlines plans for the 2017-2018 school year.

B. PURPOSE

An annual report on the JUMP Math Pilot initiative made available to schools through the Curriculum Leadership and Innovation Department to inform planning within the Toronto Catholic District School Board.

C. BACKGROUND

The Toronto Catholic District School Board initiated a pilot of JUMP Math in January 2015 as described in the October report to Board of 2016.

Schools were provided with JUMP Math teaching and student resources. The schools were: Christ the King, D'Arcy McGee, St. Angela, St. Bede, St. Bernard, St. Brigid, St. Charles Garnier, St. Clare, St. James, St. John XXIII, St. Kevin, St. Leo, St. Paul, and St. Theresa Shrine.

Since the very beginning, ongoing professional development has been offered by the Math Team from the JUMP Math Office to support program implementation.

D. EVIDENCE/RESEARCH/ANALYSIS

The focus of this report is on the assessment data for the 2016-2017 school year. Sources of evidence for this report highlight the following elements: (1) Achievement Data (2) Perceptual Data (3) Professional Development.

1. ACHIEVEMENT DATA: EQAO Mathematics

Legend:

- = Scores decreased
- / = Scores increased
- L = Scores decreased then stable
- V = Scores decreased then increased
- $\Lambda =$ Scores increased then decreased

EQAO Math across years: 2014 – 2017

Percent of student	Grade 3 Math		Grade 6 Math			Trend		
at Level 3 or 4	2014	2015	2017	2014	2015	2017	Gr 3	Gr 6
Province	67	EC	62	54	EC	50	/	/
TCDSB	66	64	63	53	52	48	\	\
St. Bernard	40	53	67	33	21	18	/	\
St. Angela	60	46	50	24	31	48	V	/
St. Charles Garnier	31	40	38	24	16	16	Λ	
St. Leo	70	64	42	43	30	64	\	V
Christ the King	91	76	69	55	70	74	\	/
D'Arcy McGee	28	51	24	34	49	31	Λ	Λ
St. Kevin	32	67	21	52	27	33	Λ	V
St. Clare	70	62	97	66	68	38	V	Λ
St. Paul	50	65	70	30	47	29	/	Λ
St. John XXIII	67	45	58	55	66	91	V	/
St. Bede	48	63	78	53	70	39	/	Λ
St. Theresa Shrine	58	54	45	32	61	55	\	Λ
St. James	38	58	41	27	14	32	Λ	V
St. Brigid	82	82	68	60	52	51	\	\

Summary of EQAO results

• The EQAO results in math for the JUMP pilot schools are inconsistent. Analysis of cohort data were found to be similarly inconsistent.

Within the JUMP Pilot schools, there were schools that received support through the Renewed Math Strategy.

Any changes in achievement scores need to be interpreted in the context of each school. The results summarized above point to the need for continued tracking and monitoring to learn about effective practices and strategies.

2. <u>PERCEPTUAL DATA</u>

In the Spring of 2017, all 14 schools in the JUMP Pilot were invited to provide feedback through three surveys: Teacher Survey, Student Survey, and Parent Survey.

Teachers (n = 100)

• Responses were received from 100 teachers in 13 schools, and teachers represented all divisions.

Survey Question	Percentage of positive responses from teachers		
Topic	> 80%	50-79%	< 50%
Supporting the		Ontario	
curriculum		Curriculum	
		Expectations 76%	
Meeting Ontario	Knowledge 82%	Application 62%;	Communication
Curriculum		Thinking 57%	43%
Achievement

		Perseverance 55%	
Student enjoyment		Program 76%	
Helpfulness of	Student	Teacher resources	Professional
materials	assessment and	69%	development 45%
	practice book 81%		
Frequency of use	Student	Lesson plans and	JUMP Math
	assessment and	teacher resources	SMART Board
	practice book 93%	65%	lessons 29%
Quality of teacher		Content 70%;	Ease of use 41%
resources		Organization 52%	
Quality of student		Content 75%;	
assessment and		Organization 71%;	
practice books		Ease of use 71%	
Quality of JUMP			Content 37%;
Math SMART			Organization 35%;
			Ease of use 29%

board lesson materials			
Helpfulness for		Students at Level	Students at Level
students		2 in math 71%;	3 or 4 in math
		Students at Level	44%
		1 in math 57%	
Use of program	Program requires supplementation (e.g., Nelson Math, EQAO-type questions, practice problem solving sheets, online applications) 88%		Program does not require supplementation 12%
Continued use of		With	Exclusively 17%;
JUMP math		supplementation	Choose not to
		71%	continue 11%

Students (n = 431)

• There was representation from 8 of the schools; 212 students were in Grade 3 and 219 in Grade 6.

Survey	Percentage of positive responses from students			
question topic	> 80%	50-79%	< 50%	
Attitudes		Reading math	Thinking about	
regarding math		problems 60%;	steps to use to solve	
		Liking math 56%;	problems 46%;	
		Good at math 50%;	Talking to parents	
			about math 39%;	
			Answering difficult	
			questions 31%	
Perceptions of		Feel more	No difference from	
success		successful this year	other years 20%;	
		69%	Feel less successful	
			this year 11%	

Parents (n = 48)

• All 14 schools in the JUMP Pilot were invited to provide feedback.

- There was representation from parents in 5 schools; 25 were parents of students in Grade 3 and 23 were parents of students in Grade 6.
- The majority of parents (73%) reported that their child likes math; 66% of parents indicated that their child is experiencing greater success this year; 30% reported "no change".
- When asked to offer comments, in general, parents expressed satisfaction with the program and indicated that it helped to nurture enjoyment of mathematics, confidence, and independence. Parents also voiced the need for supplementing the program and offering greater challenge for those students who found the program easy.

Principals (n=14)

- In September 2017, principals in the JUMP Pilot schools were asked to provide feedback regarding the JUMP program in their schools.
- The majority indicated that implementation levels were generally high (7 or above on a scale of 1 to 10) and would like to continue with implementation.
- While strengths were reported, especially at the Primary level, schools also identified the need for supplementing the program and improvements in the materials.
- Schools identified the need for ongoing dialogue and professional learning as key factors to deepening understanding, both of which will be a focus for 2017-2018.

3. <u>PROFESSIONAL DEVELOPMENT</u>

During the 2016-2017 school year, the professional learning offered to schools built on the foundational professional development that was offered in 2015-2016 (as described in the Report to Board in October, 2016).

In a joint venture between JUMP Math and the pilot schools, principals' study groups took place for the second year. Principals gathered three times in the JUMP Math Office for professional development (in October, January and April) for a consistent learning and training experience. Topics of focus and discussion included mental math, number sense, assessment, classroom management, JUMP Math lesson preparation and pacing, EQAO test preparation, and mathematics education in general.

Through the JUMP Math Office, a presentation by Dr. Tracy Solomon, Hospital for Sick Children, was also offered in October, 2016, on the topic of mathematics education.

Many teachers from the JUMP Math pilot schools received professional development support on behalf of JUMP Math. In 2016-2017, at least one professional development session took place in each of the pilot schools and these sessions were for the entire teaching staff.

E. METRICS AND ACCOUNTABILITY AND NEXT STEPS

Metrics	Next Steps 2017-18
Math achievementInconsistent ResultsOverall no improvement	 Continue to monitor achievement outcomes Continue implementation efforts with JUMP math by meeting with them to plan next steps for Professional Development
 Teacher survey Points to limitations to program and perceived strengths 	 Continue to provide all teachers with professional development focused on implementation of the JUMP program, stressing the importance of utilizing the resources as a package (not in isolation) : lesson plans; teacher resources and JUMP Math SMART board lessons Provide in-depth professional learning to teachers new to JUMP math Provide professional learning for Grade 3 and 6 teachers on the use of JUMP materials in relation to EQAO; Offer in-school support for divisional meetings and grade-level planning needs Share survey results with the JUMP Math Office
Parent survey	to inform further improvementContinue to survey parents
• Low response rate	 Increase communication regarding survey from schools to increase response rate
 Principal survey Continue implementation with supplementation of the JUMP math and professional learning 	 Deepen implementation of JUMP Math in the 14 schools across all divisions through PD session with the JUMP Team Invite John Mighton to offer Grade 3 and 6 demonstration lessons and debrief sessions Continue with principal study groups in collaboration with the JUMP Math Office on topics such as mental math, number sense,

	assessment, classroom management, JUMP Math lesson preparation, EQAO test preparation
 Program Supplementation of JUMP math is required 	 TCDSB long range planning documents were renewed this last year to include specific reference to JUMP Math resources that align with each curriculum expectation Resource teachers and math facilitators to work with JUMP Math schools with regard to expectations and areas where there is a need with supplementation

F. CONCLUDING STATEMENT

This report is for the consideration of the Board.
